Reduced fee for students.

The Summer School in Social Science Methods has been conceived for those who feel the need to refresh, deepen and widen their methodological knowledge and skills, whatever their professional situation: student, researcher or practitioner working in different scientific disciplines.

All workshops are oriented towards practical applications and the instructors are renowned specialists, experienced and enthusiastic teachers in their respective fields.

Preliminary workshops

13–14 August, 2021

E. Horber – SPSS and Statistics Refresher *

S. Kernbach – Visual Thinking for (PhD) researchers

P. Gruber – R-Data-Bootcamp *

Workshops Week 1

16–20 August, 2021

E. Horber – Quantitative methods for Social Research

P. Gagliardini – Panel data and non-linear models

S. Kernbach – Design Thinking for Research
