

CALL FOR PAPERS**Statistics, Politics and Policy:****Vol. 2022 No. 1****Political Polarization in times of pandemic and populism**

The phenomenon of political polarization is emerging as one of the most pressing global problems of the coming decade. It has recently received particular attention in academia, the media, and politics. The triad of polarization, pandemic and populism is leading to greater political instability, conflict, and social tensions on a global scale. Polarization is fueled by the fact that the pandemic and its countermeasures are disproportionately affecting poorer citizens and their livelihood. Polarization has detrimental effects on society, politics and economic interactions on almost all levels.

A wide range of academic disciplines have addressed various facets, consequences and causes of political, social, and economic polarization from different perspectives and with different methodological approaches.

SPP is calling for contributions related to the broad topic of polarization with a political, economic or social focus and encourages researchers in related disciplines to submit their papers for this call of papers to the special issue Vol.1 2022.

Topics of Interest

Statistics, Politics and Policy seeks contributions addressing polarization in, but not limited to, the following topics and fields:

- Political Communication
- Voting Behavior and Elections
- Political Mobilization and Participation
- Economic Policies and Development
- Political Systems and Democracy
- The Measurement of Polarization
- Longitudinal, Intra- and International Comparisons
- Welfare States and Polarization
- Education and Social Policies
- Gender, Racial and Ethnic Polarization
- COVID-19 and Polarization

These are just a few examples of a multitude of different topics and questions that might arise

in the course of studying this subject, and which are suitable for the call.

Submission Instructions

All research related works are welcome. Please note that contribution length is either research note (6.000 words max.) or research article (11.000 words max.). Contributions with new and innovative approaches are highly encouraged.

Rewarding outstanding work

In 2022 the Board of Editors will award the Emil J. Gumbel Prize to the author of the best paper published in Statistics, Politics and Policy.

The reward includes a financial incentive of 500 USD.

- Submissions are due on December 31, 2021 -

All manuscripts have to be submitted to our official SPP ScholarOne online center:

<http://mc.manuscriptcentral.com/dgspp>

Pre-formatting to our publication style is not necessary. Final formatting is required only after acceptance. We offer classical and open-access publication options. For author guidelines and further information on Statistics, Politics and Policy visit the website:
